Qatar committed to low-carbon energy: Amir

The State of Qatar has confirmed on many occasions that it is committed to the “transition” to low-carbon energy, said His Highness the Amir Sheikh Tamim bin Hamad al-Thani during the opening of the 6th GECF Summit of Heads of State and Government of the Gas Exporting Countries Forum on February 17. His Highness the Amir pointed out that Qatar’s carbon capture and sequestration facility and its 1.5 million tonne carbon capture will reach about 9 million tonnes of carbon dioxide. “This capacity will work with open architecture and will provide a model to be replicated in the future,” the Amir said.

His Highness the Amir added that Qatar is committed to reducing gas flaring and enhancing methane emissions, which in his view are the “two basic sources required for a sustainable development”. The forum will advance these efforts and will pursue the necessary actions and initiatives to achieve the desired goals.

There was broad consensus among leaders that natural gas is an abundant, affordable, clean, and reliable energy source, and as the fuel of choice to satisfy the growing demand for energy, and as the fuel of choice to satisfy the growing demand for energy, as it is the cleanest among fossil fuels and provides clean, reliable energy for power generation and in enhancing the quality of life for people around the world.

The forum resolved to strengthen natural gas’ environmental credentials, in particular through efforts to reduce gas flaring and methane emissions, and to focus on scientific and technological advances to capture and sequester carbon and reduce methane emissions in a wide range of applications, including the energy sector.

As for the concluding remarks, the Amir highlighted Qatar’s commitment to support the development of gas markets and of innovation in particular through energy companies such as Qatar Petroleum.

The Amir added that Qatar is committed to reduce its methane emissions by 30% by 2025 and to become a leader in this regard. Qatar is also committed to reduce gas flaring by 80% by 2025.

In his closing remarks, the Amir said that Qatar is committed to working with partners and stakeholders to achieve the desired goals and to strengthen the role of the GECF in promoting natural gas as a sustainable energy source.

Qatar committed to low-carbon energy: Amir

Qatar has confirmed its commitment to the “transition” to low-carbon energy, said His Highness the Amir Sheikh Tamim bin Hamad al-Thani during the opening of the 6th GECF Summit of Heads of State and Government of the Gas Exporting Countries Forum on February 17.

His Highness the Amir noted that the transformation efforts must be focused on the interests of consumers, and to affirm the full and permanent sovereign rights of the member states to develop and exploit their natural resources.

The forum will pursue the necessary actions and initiatives to achieve the desired goals.

There was broad consensus among leaders that natural gas is an abundant, affordable, clean, and reliable energy source, and as the fuel of choice to satisfy the growing demand for energy, as it is the cleanest among fossil fuels and provides clean, reliable energy for power generation and in enhancing the quality of life for people around the world.

The forum resolved to strengthen natural gas’ environmental credentials, in particular through efforts to reduce gas flaring and methane emissions, and to focus on scientific and technological advances to capture and sequester carbon and reduce methane emissions in a wide range of applications, including the energy sector.

As for the concluding remarks, the Amir highlighted Qatar’s commitment to support the development of gas markets and of innovation in particular through energy companies such as Qatar Petroleum.

The Amir added that Qatar is committed to reduce its methane emissions by 30% by 2025 and to become a leader in this regard. Qatar is also committed to reduce gas flaring by 80% by 2025.

In his closing remarks, the Amir said that Qatar is committed to working with partners and stakeholders to achieve the desired goals and to strengthen the role of the GECF in promoting natural gas as a sustainable energy source.

“Qatar has an annual carbon capture and sequestration capacity of up to 2.5 million tonnes, which will reach 9 million tonnes by 2030.”

“Qatar will continue to support the efforts to protect the interests of gas exporters, and to preserve the interests of the consumers, and to affirm the full and permanent sovereign rights of the member states to develop and exploit their natural resources.”

His Highness the Amir noted that the transformation efforts must be focused on the interests of consumers, and to affirm the full and permanent sovereign rights of the member states to develop and exploit their natural resources.

The transformation efforts must follow a balanced approach that takes into account human and socioeconomic development requirements in developing countries and poor countries, and the interests of the consumers and to preserve the interests of the consumers, and to affirm the full and permanent sovereign rights of the member states to develop and exploit their natural resources.

“The transformation efforts must be focused on the interests of consumers, and to affirm the full and permanent sovereign rights of the member states to develop and exploit their natural resources.”

In his closing remarks, the Amir said that Qatar is committed to working with partners and stakeholders to achieve the desired goals and to strengthen the role of the GECF in promoting natural gas as a sustainable energy source.
Qatar attends GCC-EU ministerial meeting

Qatar participated in the 38th session of the Joint Committee on Cooperation (GCC-EU) in Cairo, and the EU and the GCC held a round-table meeting. The round-table meeting discussed the development of bilateral relations between the GCC and the EU. The meeting took place in the context of strengthening co-operation between the GCC and the EU in the field of combating climate change to benefit from the experiences and expertise of the European Union and prevent the negative impact of climate change. Muraikhi explained that the GCC continues on its path to achieve sustainable development and reduce dependency on oil and gas. The GCC's efforts are in line with the EU's commitment to sustainable development goals. The GCC has made significant progress in combating climate change and reducing dependence on oil and gas. The EU and the GCC are committed to accelerating the transition to low-carbon economies and move towards more diversified and sustainable sources of energy.

Qatar's participation in the round-table meeting was represented by the Minister of State for Foreign Affairs, Abdulrahman bin Abdulaziz Al-Mulla. He explained that Qatar's participation in the round-table meeting was aimed at strengthening co-operation between the GCC and the EU, and achieving the goals of the GCC's fourth pillar of the GCC National Vision 2030, which includes comprehensive urban development. He pointed out that the development of the region is crucial for achieving the goals of the GCC National Vision 2030 and improving the quality of life for the region's citizens. He emphasized the importance of enhancing co-operation between the GCC and the EU to achieve sustainable development and combat climate change.

Al-Mulla explained that the GCC's efforts to combat climate change are in line with the EU's commitment to sustainable development goals. He emphasized the importance of accelerating the transition to low-carbon economies and move towards more diversified and sustainable sources of energy. He also highlighted the importance of economic diversification and reducing dependence on oil and gas. He emphasized the importance of enhancing co-operation between the GCC and the EU to achieve sustainable development and combat climate change.

The round-table meeting discussed the development of bilateral relations between the GCC and the EU in the field of combating climate change to benefit from the experiences and expertise of the European Union and prevent the negative impact of climate change. The meeting took place in the context of strengthening co-operation between the GCC and the EU in the field of combating climate change to benefit from the experiences and expertise of the European Union and prevent the negative impact of climate change. The meeting also discussed the development of bilateral relations between the GCC and the EU in the field of combating climate change to benefit from the experiences and expertise of the European Union and prevent the negative impact of climate change.

Qatar participates in meeting of Arab Counter-Terrorism Experts Group

The work of the 30th meeting of the Arab Counter-Terrorism Experts Group was discussed, and the participants expressed their appreciation for the contributions made to the meeting by the Arab countries. The participants also expressed their appreciation for the contributions made to the meeting by the Arab countries, and the meeting was also attended by representatives of the EU and other international organizations.

Qatar Airways Privilege Club adopts Avios as new rewards from late March

Qatar Airways yesterday announced the adoption of Avios as its new reward currency for members worldwide from late March 2022, replacing its current loyalty currency, the Qatar Airways Mileage Plus (QMP) points, in a move that will provide the benefits of Avios worldwide. QMP was introduced in 2002 and will be discontinued as Avios becomes the new loyalty currency as of late March 2022.

Qatar Airways customers will be provided even greater opportunities to accumulate and redeem rewards with the change to Avios. In addition, members will be able to continue enjoying the extensive offers and benefits current members already enjoy with QMP, along with the addition of new Avios offers and benefits. As Avios are Transferable, customers can continue to use their current miles and reward balance to continue with offers and benefits that are currently available on Qatar Airways and its partners.

Avios, the global loyalty currency used by British Airways, is a points system that rewards its members worldwide for their travel and leisure activities. By adopting Avios, Qatar Airways offers its customers a more global and extensive rewards programme, alongside the benefits of being part of the IAG (International Airlines Group) family of airlines, including Iberia, and Vueling.

Avios can be redeemed on British Airways flights and its global partners, allowing members to earn and redeem Avios for flights, holidays, car rentals, hotels, shopping, and more. Avios can also be used towards a range of rewards including award flights, hotel upgrades, and more. Qatar Airways Privilege Club is an official frequent flyer partner of IAG忠诚计划.

The change will allow Qatar Airways Privilege Club members to earn Avios throughout the IAG fleet on flights operated by British Airways, Vueling, Iberia, and Avianca. Avios will also be available on Qatar Airways flights and the airline's partners, including hotels, car rental companies, and other leisure and lifestyle partners.

Avios are also transferable, allowing members to pool their Avios with friends and family, or transfer them to members of other loyalty programmes. Avios can be redeemed on flights with British Airways and its partners, and on a variety of rewards, including travel upgrades, hotel stays, and shopping.

Qatar Airways President and CEO, His Excellency Mr. Akbar Al Baker, said: "We are excited to introduce Avios to our members worldwide, providing them with even more options to earn and redeem rewards. Avios offers a global loyalty programme with extensive benefits and rewards, allowing our members to travel and participate in activities worldwide. We look forward to continuing to provide our members with exceptional travel experiences and opportunities."
A number of new Covid cases drops below 400

The Ministry of Public Health (MOPH) reported yesterday 394 new confirmed cases of the coronavirus (Covid-19) during the past 24 hours, and added that 96 persons recovered from the disease. The number of cumulative cases in Qatar is now 116,543.

In a statement, the ministry said that 392 of the new confirmed cases were among the community and 2 among travellers. The last day for registration is March 20.

Japan looking into relaxing border restrictions for tourists

The Japanese authorities are reviewing the possibility of relaxing border restrictions, in an effort to promote tourism and bring in foreign visitors. According to reports, Japan is considering decentralizing the measures on entry for foreign visitors. This comes as the country is preparing to host the 2022 Olympic Games, which is scheduled to take place in July.

The Japanese government is considering removing the mandatory quarantine for foreign travelers who are fully vaccinated against Covid-19. This would allow tourists to enter Japan without having to undergo a 14-day quarantine period.

The government is also considering allowing foreign travelers to enter Japan without a negative Covid-19 test result. This would further ease the entry requirements for visitors.

Japan is also considering the possibility of introducing a ‘vaccine passport’ system for foreign travelers. This would allow travelers to prove their vaccination status, which would be recognized by the Japanese authorities.

The government is expected to announce the details of the new travel measures in the coming weeks. The measures are expected to be implemented in time for the Olympic Games.
Msheireb Properties initiates leasing of residential, commercial, and retail units

Msheireb Properties has announced the completion of all remaining works for the fourth phase of Msheireb Downtown Doha (MDD), making the world’s most advanced and most sustainable city district fully operational.

The fourth phase of the MDD continues three residential blocks, including a hotel, three commercial blocks with various spaces, in addition to Msheireb metro station and almost over 50% of phase 4, in a statement said.

This latest phase of MDD features high quality living and working spaces, while the commercial spaces are equipped with smart features to meet the corporate demand.

The fourth phase is sustainable and has a coherent architectural language with the other complexes.

The Msheireb metro station also serves as the key transportation hub for the district, serving the commercial, residential and retail facilities.

In a press statement, Msheireb Properties chief executive Nasser Matar al-Kuwari said: “We are proud to announce the completion of all required works in phase 4 of MDD with world-class standards, ready to meet all residential and commercial needs, as well as retail space.”

“The completion of Msheireb’s fourth phase is a key milestone for Qatar and the world, as it supports the country’s Strategy 2030, especially the environmental pillar,” he said.

“The world’s first smart and sustainable downtown regeneration project, the MDD embodies smart city technology and connectivity across the development. It incorporates other smart city developments in the world in terms of the district’s digital experience.”

With more than 10,000 car parking spaces across the underground levels, the city offers safe parking, in addition to offering everything that helps visitors to spot the car parking easily.

All buildings are Gold or Platinum level sustainable buildings, meeting the world’s highest sustainable building certifications.

The sustainable aspect of the projects adds great value to the commercial value of All buildings are Gold or Platinum level sustainable buildings, meeting the world’s highest sustainable building certifications.
Qatar Museums restores historic Al Rakiaiy fort

Team preserves ancient desert fort's unique and local building style for future generations

In a press statement, QM’s Cultural Team preserves ancient desert fort’s unique and local building style for future generations of Architectural Conservation has worked on the historic Al Rakiyat fort in the north of the country. The current QM-led restoration effort follows leading global conservation standards and carefully preserves the unique, local building style and authentic architectural components of the historic building. The programme is being offered by Kahramaa as a National Service Program with an aim to develop and expand its horizons in the technical and behavioural aspects of water stations. They were trained on various mechanisms for dealing with emergency situations. They were trained on various mechanisms for dealing drinking water to consumers. Kahramaa holds graduation of National Training Programme

The training programme comes within the framework of the partnership agreement signed by Kahramaa and the Ministry of Defence (MoD) to develop and expand its horizons in the technical and behavioural aspects of water stations. They were trained on various mechanisms for dealing with emergency situations. They were trained on various mechanisms for dealing drinking water to consumers.

Kahramaa holds graduation of National Training Programme

The training programme comes within the framework of the partnership agreement signed by Kahramaa and the Ministry of Defence (MoD) to develop and expand its horizons in the technical and behavioural aspects of water stations. They were trained on various mechanisms for dealing drinking water to consumers. The integrated theoretical and practical sessions were supervised by a group of Khaleeji experts and engineers, who worked under the supervision of the Training Department in the Ministry of Defence. It was in co-operation with the department concerned to improve the training plan and approved curricula and develop them according to the data available from the first version of the training, and the latest educational methods used, ensuring it represented a great opportunity to acquire knowledge and skills related to water pumping and distribution operations while enabling them to complement the state’s efforts in water management and quality assurance. The training was attended by a number of Kahnawa engineers and technicians while attending the training the participants expressed their full satisfaction with the content of the training and praised the educational methods used, stressing it represented a great opportunity to acquire knowledge and skills related to water pumping and distribution operations while enabling them to complement the state’s efforts in water management and quality assurance.
Qatars National Vision 2030 (QNV) launched Phase 3 of a project to further develop well and to create water and environmental sanitation projects in Yemen.

With new 149 water projects in several governorates, including 112 wells which are more than 100 meters deep, the QNV aims to achieve a sustainable water project development that will further support water projects, by providing new water projects to the people of Yemen.

The project, which is part of the constraint phase of the QNV, will result in a significant increase in the number of wells and the quality of drinking water for the populations of Yemen, as well as in the development of an alternative water project, which will be a source of income for the locals and the nation.

The project is part of the country’s efforts to ensure that all people have access to clean and accessible water, which is essential for their survival and well-being.

The project will be implemented by the Ministry of Commerce and Industry (MoCI), in cooperation with the Supreme Committee for Delivery and Legacy (SCDL), which is responsible for the execution of the project.

The project’s implementation will be supervised by the Ministry of Commerce and Industry, in cooperation with the Supreme Committee for Delivery and Legacy, and will be carried out in collaboration with the Ministry of Agriculture and Irrigation and the Ministry of Health and Prevention.

The project will be implemented in several governorates, including Aden, Taiz, Lahj, and Sanaa, and will be completed in the next 12 months.

The project is part of a larger initiative to provide clean and accessible water to the people of Yemen, and it is expected to contribute significantly to the country’s national development and growth.
QU researcher wins regional award

T he 2021-2022 school year in Qatar Charity School for Girls in the Education City area has come to an end. The school conducted several training sessions for the teachers. Dr. Isalah Al-Shanahan, dean of the School of Science and Information Technology at CNA-Q, said: “Our training programmes to revitalize creates a new point of view on science for teachers. Through this programme they can enhance student’s motivation to learning and explor- ing the STEM world and provide our young students with a solid foundation to build the future of Qatar.”

Dr. Mohamed al-Derham, acting dean of QU’s College of Science and Engineering, said: “The results of these strategic meetings were reflected in the uni- versity’s success in developing research culture and its international rankings and rankings. We are now going beyond 80 researchers were included in the most cited researchers worldwide. Currently, the uni- versity is working to develop the search for more researchers who can bring about various academic prog- Rams that reward achievements in research, as well as to provide various services that contribute to the development

In her welcome ad- dress, she said the forum highlighted important topic related to the success of College of Business and Econ- omics in all the universities of the Arab countries. “We are always looking forward to today’s activities, discuss challenges, and share best practices for the benefit of our students and soci- ety.”

Lebanon economic collapse one of the world’s worst ever

Lebanon is grappling with one of the worst financial collapses the world has ever seen after successive governments piled up debt with little to show for their spending binge. Piled up public debt and an unsustainable way it was financed, the crisis has slammed Lebanon’s gross domestic product (GDP) to 23% in 2021, a six-year low, according to World Bank. Already one of the world’s most indebted, millions more have been pushed into poverty.

The World Bank said last month that the country’s economy has become ‘irreversible’. Its gross domestic product has shrunk by 43% in value since 2019 and moved into “severe recession”, with real incomes declining by 75% and GDP per capita dropping by 58.1% since 2019, plummeting to an estimated $1,300 in 2021 – far more than levels after successive governments piled up debt with few restraints.

Lebanon’s economic crisis is the world’s worst in two decades. The world has seen bigger financial crashes globally since the 1850s. The biggest financial crashes globally since the 1850s. The Mediterranean country had an oversized but prosperous banking system before the crisis. It also had an oversized but prosperous banking system before the crisis. The largest ever public debt and a huge black market. The Lebanese pound, officially pegged at 1,500 to the dollar, has lost much more than 90% of its value after an explosion in August 2020 at the seaport of Beirut.

Despite the economic collapse, millions more have been pushed into poverty. The World Bank estimated in December that 70% of the population was living below the poverty line. The crisis has also led to a huge black market. In December, the government set financial sector losses at $40 billion. The country is suffering the worst economic crisis in its history.

The Lebanese pound, officially pegged at 1,500 to the dollar, has lost much more than 90% of its value after an explosion in August 2020 at the seaport of Beirut.

Lebanese officials began talks with the International Monetary Fund last month to pull the country out of the worst economic crisis in its history. The crisis has also led to a huge black market. Already one of the world’s most indebted, millions more have been pushed into poverty.

The World Bank said last month that the country’s economy has become ‘irreversible’. Its gross domestic product has shrunk by 43% in value since 2019 and moved into “severe recession”, with real incomes declining by 75% and GDP per capita dropping by 58.1% since 2019, plummeting to an estimated $1,300 in 2021 – far more than levels after successive governments piled up debt with few restraints.
Ukraine running out of options and Putin heat

Russia sets up diplomatic ties with Ukraine's separatist territories

Russia yesterday said it had established diplomatic relations with the separatist regions of the east, as Western officials voiced concern that Moscow could be planning a new incursion into Ukraine. Russia's recognition of Donetsk and Luhansk as "republics" could pave the way for Moscow to deploy forces abroad, paving the way for the Russian leader to send troops into Ukraine despite a fierce global backlash.

Earlier yesterday Russian lawmakers gave Putin the green light to deploy forces at any time, paving the way for his foreign minister to send troops into Crimea in a stealth operation. Putin is continuing to plan for a full-scale invasion of Ukraine. The Kremlin regretted Germany's move and said it hoped the West would not take this as a signal to escalate sanctions if Russia did not accept its pro-Western course.

A UN Security Council resolution, which would allow the body to have a televised debate with this country's leader, has been put on the agenda by the two breakaway regions' leaders, the Kremlin said.

"Western countries have already declared that they do not accept our recognition of the two regions," the Kremlin said yesterday. "The resolution of the UN Security Council has been on the agenda since the beginning of the conflict in eastern Ukraine."

"The resolution is expected to serve as a basis for further discussions on the situation in the region."

The United States, which has already imposed sanctions on Russia, has said it would not accept the recognition of Donetsk and Luhansk.

"We continue to call on Russia to withdraw its forces from Ukraine, and we will continue to support the sovereignty and territorial integrity of Ukraine," a US State Department official said yesterday.

But the US and its allies have said they are not ready to escalate sanctions unless Russia takes a more conciliatory stance.

"Every indication is that Russia is continuing to plan for a full-scale invasion of Ukraine," said RIA news agency.

"This is continuing to be a matter of concern for the international community," the official said.

"We continue to call on Russia to withdraw its forces from Ukraine, and we will continue to support the sovereignty and territorial integrity of Ukraine," a US State Department official said yesterday.

"These include huge investments in natural gas technologies and a regional and global regulatory system for capturing and injecting carbon dioxide, which, when fully operational, will become the largest of its kind in the GCC industry," His Highness the Amir said. "Natural gas will be rolled up to generate part of the electricity required for this project."

"Over the past two decades, I have seen a major change in the energy chart, where natural gas has occupied a large space, for several reasons, including that it is the least harmful energy source to the environment among other fossil energy sources. Natural gas has been able to occupy increasing spaces in the energy basket in many countries."

"And this is the point made by the Amir said. "We must continue to work to protect the interests of consumers and producers and maintain the stability of the markets." His Highness the Amir said.

"We have also seen the importance of the 6th Gas Exporting Countries Forum, which was held at the Sheraton Doha under the slogan 'Summit an important platform for industry'. "The Amir added."

In a speech delivered during the opening session of the 6th Gas Exporting Countries Forum (GECF), the Amir said. "The State of Qatar welcomes working with everyone to make common good, security and stability prevail among all peoples of the world."

"He also said that the GECF plays a major role in achieving this objective and in promoting the Qatar Gas Technologies used in the various stages of natural gas production."
