TotalEnergies explores rigless technology to cut emissions, costs

TotalEnergies recently conducted a two-day workshop in Qatar, aimed at discussing the latest innovations in rigless technology and minimizing the environmental impact of oil and gas projects. The workshop featured presentations from TotalEnergies representatives, QatarEnergy LNG (formerly QatarEnergy), and representatives from other leading oil and gas companies.

Participants, including representatives from TotalEnergies, QatarEnergy, Nusonix logging tool, Baker multifunctional logging tools, and Isol8 alloy plugging tools, delved deep into the latest innovations in rigless technology. These technologies include the Axter CL line removal tool, an explosives-free metal removal tool, and the Owen Oil Tools Pulmonator, which enhances performing operations.

The rigless technologies discussed in the workshop include Nuisance logging tools, Baker multifunctional logging tools, and Isol8 alloy plugging tools, which are among the latest innovations in rigless technology. These technologies are expected to cut emissions, costs, and carbon footprint.

The event not only emphasized TotalEnergies’ commitment to meeting regulatory standards and environmental responsibility but also showcased TotalEnergies’ dedication to excellence in the industry.

The 15th annual MEIRA conference, hosted on November 14, 2023, in Manama, recognized Baladna, Qatar’s leading dairy producer, for its outstanding Investor Relations (IR) reporting. The company received first place in the digital category and second place in the overall category for its outstanding IR reporting, cementing its position as a leader in corporate communication and investor relations.

The awards recognize Baladna’s dedication to excellent corporate governance and investor relations, as well as its commitment to the highest standards in reporting, with the aim of enhancing the reputation and efficiency of Middle Eastern capital markets.
