OQB maintains price and financial stability; inflation moderates and banks remain healthy, says IMF

By Samir/Thaier Allam

The Qatar Central Bank (QCB) has maintained price and financial stability as inflation moderated following monetary policy tightening in tandem with the US Federal Reserve, consistent with the currency peg to the US dollar, said in its Ar- rabi report for the third quarter of the year.
The IMF team, led by Ken Sim, had met with Minister of Finan- cies and Economy HE Ali bin Ahmed al-Ku- saini, Governor of the Qatar Central Bank Bandar bin Mohamed bin Saoud and other senior government officials, and private sec- tor representatives during the meeting.
Reiterating that the QCB's prudent policies have underpinned financial stability, the IMF said it continued diligence is "critical" to maintaining sound heading structure, and banks remain healthy, says IMF.

QFMA participates in IOSCO annual meetings in Cairo

The Qatar Financial Markets Authority (QFMA) has attended the annual meetings of the International Organization of Securities Commissions (IOSCO), which is the reference institution for capital markets regulators worldwide. The meetings, which were held in Cairo, Egypt, were attended by a delegation headed by Mr. Tamer bin Ahmed Al Diahli, QFMA's executive chairman.
The QFMA has been an active member of IOSCO since 2013. The QFMA has participated in various important meetings, including the 25th meeting of the Executive Committee, the 20th meeting of the IOSCO Board, and the 11th meeting of the IOSCO Working Group on Emerging Risks.
The QFMA is committed to maintaining the highest standards of financial stability and transparency in the Qatar market and working closely with other securities regulators worldwide.

The US-Qatar Business Council (USQBC) and USAINC welcomed KRH as its new esteemed member.
The USQBC, a prominent advocate for fostering mutual economic growth and celebrating business prospects between the US and Qatar, has welcomed KRH, a prominent advoca- te for strengthening economic and commercial ties between the two nations.

Japana's government is aiming to liquidi the national gas grid to supply more electricity to the demand of its industry. This move is expected by dealers and suppliers to have a strong impact on the energy sector. The energy bill has increased by 60% in the past year, which is down 54% from the year before, which is down 54% from the year before.

The measures in place are expected to have a significant impact on the energy sector. The government is planning to increase the use of renewable energy sources such as solar, wind, and hydroelectric power. This is expected to reduce the reliance on fossil fuels and improve the country's energy security. The measures are also expected to have a positive impact on the economy, as the country is well-positioned to become a leader in the renewable energy sector.

The government is also expected to continue its efforts to reduce greenhouse gas emissions and combat climate change. This includes measures to increase the use of electric vehicles and the development of new technologies to reduce energy consumption in industries. The country is committed to achieving net-zero emissions by 2050, and these efforts are expected to have a significant impact on the environment.

The measures are also expected to have a positive impact on the health sector. As renewable energy sources are cleaner and produce less pollution, the country is expected to see a reduction in air pollution and other health issues. This is expected to improve the quality of life for its citizens.

Overall, the measures taken by Japana's government are expected to have a significant impact on the energy sector, the economy, and the environment. The country is well-positioned to become a leader in the renewable energy sector and continue its efforts to combat climate change.
Qatar bourse scales 10,200 levels as index gains 45 points

Petroleum in OPEC with seatat Seax UK
