QatarEnergy’s announcement, the shares of MPHC were issued for subscription in December 2023, that it will distribute two equal sets of the incentive shares to eligible shareholders in the first quarter of December 2023. The provisional distribution date will be 30 November 2023.

QatarEnergy's announcement, its 'Qatar Banking Perspectives

The country’s imports from January to November 2023, the country’s imports from January to November 2023.

Qatar's banking sector is

QatarEnergy's announcement, to maintain the sustainability and the future of the banking industry, it decided to lower the capital requirements. The central bank has rightly adopted a phased approach to meeting international standards, which has led to a strengthening of the financial sector.

Qatar has recently tightened its banking regulations, Qatar has recently tightened its banking regulations.

As Qatar continues to evolve its regulatory framework, the country is moving away from a regulatory position to a low key player in the global financial system.

In recent years, the banking sector has been characterised by continuous growth and stability, which has helped the country’s business sector.

To maintain the sustainable and the future of the banking industry, the country’s regulators have always actively planned their post, ostensibly adapting to evolving economic conditions and international standards.

In line with international banking regulations, Qatar has progressively implemented Basel III, a new banking capital adequacy, liquidity and risk management in the banking sector.

These standards place greater stress on the banks and require them to maintain a robust and secure financial

This has been a particularly fruitful period for the country, with a significant improvement in the stability of global banking system, which has helped the country’s business sector.

Similarly, the group of "Paywite, Doha Paywire and Other Gas Turbines; Parts Thereof" were transferred to Qatar at this time, which allowed the country to adopt a phased approach to meeting the capital requirements.

The results of this initiative are also reflected in the recent FIAC’s report, which commends Qatar’s efforts in combating money laundering and terrorism.

The distribution of the incentive shares on the second annual dividend will end in 2023, the share capital of MPHC as the two distributions were allocated by Edaa, in accordance with the eligibility criteria outlined in the country’s IPO prospectus, on a pro-rata basis to its shareholders.

Ensuring trust and security in a digital banking landscape

In an era where digital advancements redefine the way we manage our finances, ensuring the safety and security of digital banking channels is paramount.

"Commercial Bank's Digital Banking strategy is to dispense with the fear of threats by optimising the bank's fraud detection mechanisms by eliminating controls and tracking performance to address rapid evolving threats.

1. What role does collaboration with Law Enforcement agencies play in your strategy to combat digital fraud?

Answer: "Collaboration with Law Enforcement agencies is a coordinated effort to combat financial crimes."

2. How do you educate Bank employees and customers about potential digital fraud risks and preventative measures?

Answer: "We maintain strong partnerships with Law Enforcement agencies in Qatar, drawing knowledge and intelligence with a coordinated effort to combat financial crimes."

3. What are the latest fraud trends or scams targeting Digital Banking customers?

Answer: "We monitor constant changes in fraud trends and adapt our fraud monitoring solution to address the latest threats."

4. How do you stay updated on the latest trends and technologies used by fraudsters in the digital realm?

Answer: "We regularly participate in banking industry forums, attend relevant conferences, and subscribe to threat intelligence feeds to stay abreast of emerging fraud patterns."

5. Can you provide a specific instance where you successfully detected and mitigated a digital fraud incident?

Answer: "Our enterprise fraud monitoring solution flagged a suspicious digital banking login attempt. Based on the evidence gathered, our fraud monitoring solution successfully identified the fraudulent activity and prevented the unauthorized access."

6. How do you balance customer experience with stringent security measures to ensure a seamless banking experience?

Answer: "Our strategy is to "clap-closure at the door" by optimising our fraud solution in real-time for enhancing controls and tracking performance to address rapid evolving threats."

7. What are the key strategies identified for combating digital fraud?

Answer: "We identify the latest fraud trends and adapt our fraud monitoring system to enhance our fraud prevention strategies."
South Korea exports accelerate as shipments to U.S. overtake China

T he US labour market probably re-
stayed steady while wage gains continued to ease, setting up for anemic economic growth in 2023.

Government data on Friday project-
ning an annual increase of 2.2% for the 12-month period ending in December, down from 2.5% in the 12 months through November.

The unemployment rate also declined to 3.5% in December from 3.7% the previous month, in line with market expectations.

This was the lowest rate since the start of the pandemic in March 2020, but it was below the 3.4% rate that economists had forecast.

The US labour market has been under pressure, with inflation at 50-year highs and the Federal Reserve raising interest rates to combat it.

The data showed that the US labour market has been losing momentum, with job gains slowing and wage growth decelerating.

Despite the gains, the employment data remained strong, with the US economy adding more than 2.5 million jobs in 2022.

The US labour market is expected to remain strong in 2023, but growth is likely to be slow, with the economy facing headwinds from high inflation, rising interest rates, and the war in Ukraine.
