Parents face challenges over children's excessive use of technology

**By Joseph Vaughn**

Recently published study has recommended new regulations to curb the excessive use of technology by children and parents. The study acknowledges the importance of technology in the daily lives of children, and it highlights the need for parents to monitor and guide their children's usage. The study concludes that excessive technology use can lead to various health issues, including obesity, sleep disturbances, and social anxiety. The researchers suggest that parents should set strict guidelines for technology use, limit screen time, and encourage other activities such as outdoor play and reading. The findings are supported by a recent survey of 2,000 parents across the United States, which found that 90% of parents believe their children spend too much time on screens.

### Challenges

- **Screen Time:** Children are exposed to excessive screen time, which affects their physical and mental health.
- **Social Media:** The use of social media can lead to cyberbullying and addiction.
- **Preschoolers:** Young children should not have access to smartphones.
- **Privacy Concerns:** Children's data privacy is at risk with the proliferation of technology.
- **Parental Influence:** Parents must set an example by managing their own technology use.

### Solutions

- **Set Limits:**家长 should set limits on screen time and ensure that children are engaged in other activities.
- **Monitoring:** Monitor children's internet and social media usage to prevent cyberbullying.
- **Parental Involvement:** Encourage parents to be involved in their children's technology use.
- **Privacy Policies:** Children's privacy should be protected through strict privacy policies.
- **Education:** Educate both children and parents about the risks and benefits of technology.

The study concludes that by implementing these solutions, parents can help their children develop healthy technology habits. It is essential for parents to be proactive in guiding their children's technology use to ensure a safe and healthy environment.

Maersk warns of major disruption as it diverts ships away from Red Sea

Ships across the world are warning of major disruption — said to be the shortest route route — after Warship Alliance's (WSA) decision to divert ships around the Red Sea region due to significant disruption.

According to shipping lines and industry sources, the move comes amid heightened tensions in the Gulf region, particularly between Iran and the US. The warship alliance said its members had decided to divert ships on the Red Sea route due to "safety concerns." The warship alliance, which includes Maersk, Evergreen, and CMA CGM, said it had decided to take the precautionary measure as a result of "the current security situation in the Gulf of Aden and Red Sea." The association also said it had taken into account the threat posed by "pirates and armed groups, as well as the potential for other security risks." The decision was made after a meeting with authorities in the region, who had expressed concern about the security situation. The Red Sea is a vital route for trade, with shipments of oil, gas, and other goods passing through it. The decision to divert ships is expected to disrupt trade and increase shipping costs. The decision has been met with criticism from some shipping companies, who say it will increase costs and disrupt supply chains. Maersk, the world's largest shipping company, said it was reviewing its shipping routes in the region and would consider rerouting its vessels. The company said it was working with the authorities to ensure the safety of its ships and crew. Other shipping companies have also said they are reviewing their routes in the region. The Warship Alliance's decision comes amid heightened tensions between Iran and the US, with both countries accusing each other of threats to maritime security. The US has also increased its military presence in the region, with a new military base being built in the United Arab Emirates. The decision has been met with mixed reactions, with some shipping companies saying it was necessary to ensure the safety of their ships, while others have criticized the decision as unnecessary and disruptive to trade. The decision to divert ships highlights the ongoing tensions in the Gulf region and the challenges faced by shipping companies in ensuring the safety of their vessels. The shipping industry is calling for increased cooperation and coordination between governments and shipping companies to ensure the safety of shipping routes in the region. The decision to divert ships is expected to disrupt trade and increase shipping costs. Iraq prepares to close down US-led coalition's mission: PM

东北

Satish Babu Rayaguru

The US military is preparing to withdraw all US-led multinational military coalition forces from Iraq in accordance with the terms of a security agreement between the US and Iraq. The agreement was signed in 2013 and is set to expire in 2018. However, some coalition forces will remain until the end of the year to provide training and support to the Iraqi military.

Trump overstated worry by billions, New York A-G says in civil fraud case

The New York Times
January 6, 2024

Former President Donald J. Trump should be permanently barred from ever running for public office because he engaged in a "corrupt fraud" and the state should be allowed to seek reparations from him and his company, according to a lawsuit filed on Wednesday.

The suit, brought by the attorney general, Letitia James, and the state comptroller, Cynthia N. Nygren, is the latest in a string of legal actions against Mr. Trump. The state's attorney general has been investigating the former president since 2018.

"This threat of violence is an untenable and unprecedented threat to our democracy," Ms. James said in a statement. "It's time for us to hold Mr. Trump and his company accountable for their conduct."
US readyes relief as Japan earthquake toll nears 100

UT TER SHOCK AND SORROW, the United States readies immediate relief and aid for Japan, which has been hit by a devastating earthquake that killed at least 100 people, injured tens of thousands, and caused widespread destruction.

President Obama and the US government announced that they are sending rescue teams, medical supplies, and other aid to Japan to assist in the aftermath of the disaster. The US National Guard has been deployed to help with rescue efforts, and the US Coast Guard is providing search and rescue services.

Japanese Prime Minister Naoto Kan has appealed for international assistance, and the US government has pledged to provide any support that is needed. The US is working closely with Japan to coordinate relief efforts and ensure that aid reaches those in need.

The earthquake, which struck at 2:40 p.m. local time, was the worst in Japan in over half a century. It was followed by a series of aftershocks, including one that was 7.1 magnitude.

In the immediate aftermath, rescuers are working to find survivors and save as many lives as possible. The US military has been called in to help with search and rescue efforts, and humanitarian organizations are working to provide food, water, and other essentials to affected areas.

The US government has also announced that it will provide $10 million in assistance to Japan, and that it will work with international organizations to ensure that aid is accessible to all those who need it.

The Japan earthquake has shocked the world, and the US government is taking immediate action to provide relief and support to those affected.

Plane wreckage being cleared from Tokyo airport after crash

A plane carrying 30 people crashed into the terminal building of Haneda airport in Tokyo on Sunday, killing four people and injuring at least 12 others.

The plane, a Japan Airlines Boeing 787 Dreamliner, was en route from New York to Tokyo when it crashed into the airport's main building. The crash caused a fire that quickly spread, causing widespread damage.

Japan Airlines said that all 30 passengers and crew on board were accounted for, and that there were no signs of any survivors.

The crash is being investigated by the Japanese government, and the US National Transportation Safety Board has been notified.

The Boeing 787 Dreamliner has been under scrutiny after a series of incidents involving the aircraft, including a mid-air fire during a test flight in 2013.

The crash is a major setback for the Dreamliner program, which has been plagued by technical problems and safety concerns.

The Dreamliner is a twin-engine aircraft that uses a combination of advanced technology and materials to achieve greater fuel efficiency and performance.

The US transportation secretary, Ray LaHood, has said that the Dreamliner program is on track, and that the US government is working to ensure that the aircraft is safe.

LaHood said that the US government is working with Boeing to ensure that the Dreamliner is safe, and that the US government will continue to monitor the aircraft closely.

India intercepts hijacked Liberian-flagged vessel in Arabian Sea, navy says

India denies reports that it hijacked the vessel, which was reportedly hijacked by pirates off the coast of Somalia. The vessel, the MV Mako, was registered under the Liberian flag and was reportedly hijacked by pirates off the coast of Somalia. The vessel was carrying a cargo of iron ore and was sailing from the Gulf of Aden to the port of Fujairah in the United Arab Emirates.

A spokesperson for the Indian Navy said that the vessel was hijacked by pirates and that the Indian Navy had successfully repelled their attack. The vessel was then directed to the port of Fujairah, where it arrived safely.

The hijacking of commercial ships and attempted hijackings near the Gulf of Aden have been a recurring theme in the region. India has a long-standing interest in ensuring the safety and security of its vessels and personnel in the region, and has taken steps in recent years to improve its anti-piracy efforts.

In addition to the hijacking of the Mako, the Indian Navy has also been involved in a number of other anti-piracy operations in the region, including the capture of a hijacked vessel in the Arabian Sea in January 2023.

"Our forces have always been prepared to take all necessary steps to ensure the safety and security of our own personnel and vessels in the region," the spokesperson said. "We will continue to take all steps necessary to ensure the safety and security of our vessels and personnel in the region."

North Korea moves to redefine its relations with South Korea

North Korea has made a major foreign policy announcement with South Korea, making a change to policy and government support, which suggests it has moved from a separate, state-rate, to a more united, state-side, relationship with South Korea.

The announcement comes with a deadline of 2024, under which South Korea would have to make a major decision to maintain a separate, state-rate, relationship with South Korea.

The decision is seen as an opportunity for the two countries to redefine their relationship and work together to achieve a more unified, state-side, relationship.

Where it pays to be a banker

A decade and a half after the global financial crisis, the past sins of the banking industry weigh more heavily on some jurisdictions than others. Recent regulatory and tax developments and proposals to tax investment bankers are likely to make these jurisdictions more attractive to financial institutions and their investors.

Trump’s rivals give him a pass on Jan 6 attacks as hunt for Iowa votes heats up

By Bernd Stolzenberg in Des Moines

Donald Trump’s operation is on a roll in Iowa. In the last two weeks, the former president has campaigned in three states and won the Iowa caucuses on February 3, 2021, in which he won the Iowa Caucuses. He is now focusing on Iowa and other key states in the November election.

In Iowa, Trump has been campaigning in Des Moines, Council Bluffs, and other cities, where he has been well-received. He has been giving speeches and holding rallies, where he has been attacking his rivals and promising to bring back jobs and prosperity.

Shop Qatar holds first raffle draw

Qatar Tourism conducted the first raffle draw to crown the winner of the Shop Qatar 2020 at Marriott Hotel yesterday. The winner was a Ms. Fozia Bint Ali, who won AED 100,000 and was also named as the second draw scheduled at Ministry of Education on January 15. The top prizes comprise four luxury cars along with other prizes and giveaways.

Farm fresh at the expo

The Farmers Market at the Ministry of Municipality and Environment has given life, with the local farmers taking part in the exhibition through various activities, where local farmers of the area are exhibited and sold.

The farmers will introduce their activities with the Farmers’ Market, where flowers, spices, honey and other seasonal fruits will be sold from next week onwards, said Nada AlBusaidi. "The ministry is holding the local farmers through various initiatives and give them spaces to sell the products. These include farm yards across the country and other farming activities."

The ministry is also looking for an opportunity to introduce fresh products that are grown and their growth in the district, adding that the ministry wants to provide ready products by reasonable prices.

Apart from vegetables, the ministry also held the first Expo 2020 in the district, featuring fruits, including figs and strawberries.
