USS grounds some Boeing MAX planes after Alaska Airlines aircraft blackout

T he US aviation regulator canceled the temporary grounding of certain Boeing 737 MAX aircraft following a series of failures involving the aircraft’s flight control system.

A plane of family lies on the left side of the aircraft after it crashed into a hillside near Mount. Oregon, en route to St Paul, Minnesota, killing all 171 people on board. The accident has led to a call for safety improvements.

Israil, Hezbollah trade fire amid alarm over Gaza war spillover

Gaza massacre toll climbs to 22,722

Five Hezbollah fighters killed in Israeli air strikes, reporting. Blinken, Borrell on region’s tense calm temps

Israel’s military said it had responded to the rockets fired by the Hamas militant group, which has been fighting with Israel in territory held by the Palestinians. Israel has called for calm and has urged all parties to de-escalate.

Militant tension has flared in recent weeks as the two sides continue to blame each other for the violence.

The three-month-old Gaza war has led to a series of intense clashes, with Israel and Hamas exchanging rocket fire and Israeli strikes targeting Hamas infrastructure.

Hezbollah says it has launched a string of rocket attacks against Israel from its bases in Lebanon and southern Syria.

President Joseph Biden met with his Israeli counterpart, Yair Lapid, to discuss the situation.

US President Joe Biden has met with the leaders of the Gaza and Israeli delegations to discuss the situation.

People wake up in a hospital in Ashkelon after Israeli air strikes overnight, killing 8 people, including a child.

Israel’s military said it had responded to the rockets fired by the Hamas militant group, which has been fighting with Israel in territory held by the Palestinians. Israel has called for calm and has urged all parties to de-escalate.

Hezbollah said it had launched a series of rocket attacks against Israeli targets in the south, causing no injuries or damage.

Delivery motorcyclists to be booked for not using the right gauge

The Ministry of Interior has announced that it will start monitoring the new adherence of delivery motorcyclists to the right lines of traffic in the state. This decision aims at maintaining the safety and security on roads, and applying the best measures and mechanisms to reduce accidents, as well as to prevent traffic violations from those motorcyclists. It has been decided to implement a number of units to follow the right lines, except for preeminent, red-capped, and crossroad within the areas of towns and cities, said Director of the Traffic Awareness Department, Brig Gen. Jasim Nazari al-Hashimi. Brig Gen. al-Hashimi said that the measure will be monitored through traffic cameras and traffic patrols starting today, adding that the decision was based on the necessity to ensure traffic rules and eliminate any faults of these units. The decision follows a request made by the FID to the Ministry of Interior to adopt the measures and implement the traffic application. It is aimed at ensuring that the traffic application is maintained and followed by the units, as well as to eliminate any faults in the traffic applications. Friends of Environment Centre holds lecture on sustainable development

The Ministry of Environment and Climate Change (MECC) has launched the first Environmental Awareness Camp in Qatar. The camp, which started on Monday, aims to raise awareness about environmental issues and promote sustainable development. The camp includes educational seminars for the public on topics such as water conservation, energy-efficient practices, and waste management. The seminars are designed to educate participants on the importance of protecting the environment and taking actions to reduce their ecological footprint. Participants also have the opportunity to engage in hands-on activities, such as recycling and composting workshops. The camp is part of the Ministry of Environment and Climate Change’s efforts to promote sustainable development and raise awareness about environmental issues. The camp is open to the public and is located at the main campus of the University of Qatar. Visitors are encouraged to attend and learn about the importance of environmental protection and sustainable development.

Ministry launches environmental awareness camp

The Ministry of Environment and Climate Change (MECC) has launched an Environmental Awareness Camp in Qatar. The camp aims to educate people about the importance of protecting the environment and living sustainably. The camp includes several activities, such as workshops on recycling, composting, and energy conservation. Visitors are also encouraged to participate in various games and activities that promote environmental awareness. The camp runs from now until the end of the month. Scopes of Work:

The monolithic platelet-rich plasma (PRP) system is designed for high-speed, large-volume processing. The system is capable of: (a) dilution and activation of platelets, (b) centrifugation, (c) platelet cryopreservation, (d) platelet storage, (e) platelet delivery, and (f) platelet analysis. The system is designed to be modular and scalable, allowing for easy integration into existing workflows and facilities. The system is also designed to be user-friendly, with intuitive controls and easy-to-use software. The system is intended for use in a variety of settings, including hospitals, research institutions, and private clinics.
Getting ISO (9001) certificate for the second time: Alfardan Jewellery Workshop... an icon of quality and among the sophistication in the world

The workshop is comparable in the excellence and history to the most ancient jewelry workshops in the world, qualifications and making the workshop's employees at the highest level is the secret of our distinction. Continuously monitoring the opinions of our customers to develop our products and continue our leadership.

Alfardan Jewellery Workshop evaluated its great efforts in applying the highest international quality standards by obtaining the international standard specification certificate for quality management systems (ISO 9001:2008) for the second time as the first company in the region to achieve this great accomplishment. Alfardan jewellery is distinguished by being the exclusive agent for many major jewellery and watches companies worldwide.

Mr. Zohair Qasim, Workshop Manager, said: "For the second time, the workshop has achieved in obtaining the ISO certificate (ISO: 9001:2008), which represents the commitment of our journey of excellence in the jewellery industry and our commitment to applying the highest international quality standards."

This is the second time that Alfardan Jewellery Workshop has obtained the ISO, as the first company in the region to make this great achievement, due to the company's commitment to excellence and the permanent development and continuation of its journey in the jewellery industry. The workshop's obtaining this certificate is only confirmation of the success of its efforts and its continuous development of its techniques and expertise.

The Administration is keen on development and provides us with new ideas and designs.

Commitment to the highest standards of quality and sophisticated designs is the secret of our permanent excellence.

Sahag Khajadourian

"We are always improving our level and measuring the opinion of our customers and the public, because we work for them, especially since Alfardan Jewellery Workshop is one of the first workshops in the region. We added to expand that the workshop's obtaining the ISO certificate (ISO 9001:2008) for the second time is a culmination of the great efforts exerted by all the workers in the workshop, with the support and guidance of Mr. Hossain Ibrahim Alfardan, Chairman of the Board of Directors of Alfardan Group, and Mr. Ali Hossain Alfardan, Vice Chairman of the Board of Directors and President of Alfardan Jewellery.

He pointed out that Alfardan Jewellery Workshop is comparable in its distinction, features, and long history to the most ancient jewellery workshops in the world due to its advanced ideas and sophisticated and constantly renewed designs, especially since the management is extremely keen on development and provides us with new ideas and designs and reconceiving the needs of the market, which drives us to continuous development.

He said: "We work very close to our clients and in line with the global development in the jewellery industry to serve our customers, especially since we provide after-sales service, and we constantly measure our customers' opinions to know their point of view on our products to develop them permanently and continually, in order to achieve complete satisfaction of our customers and that Alfardan Jewellery continues its leadership in the local, Gulf and international markets.

He explained that the ISO includes dozens of countries, more than a million companies and joint institutions, and that in global statistics, in Alfardan Jewellery Workshop to work towards second, assuming that the products of Alfardan Jewellery Workshop are among the finest in the world.

To maintain this and continue excellence and success, Alfardan Jewellery Workshop continues to invest in the workshop's equipment and provides the best qualified technical experts and skills, and experience, and this is the secret of its success and distinction in the market by providing the highest quality and the most wonderful and beautiful design.

US FAA orders Boeing 737 MAX 9 planes grounded after blowouts

WASHINGTON

The Federal Aviation Administration ordered Boeing 737 MAX 9 aircraft grounded on Thursday following two incidents in recent weeks. The FAA said the order is temporary while it investigates the cause of the incidents.

The FAA said it was acting after a review of the incidents. In early March, a 737 MAX 9 aircraft made a hard landing at Dubai International Airport in the United Arab Emirates. In late April, a 737 MAX 9 operated by All Nippon Airways landed safely at Tokyo Haneda International Airport after experiencing unexpected and uncontrolled rapid descent.

The FAA said it had ordered Boeing to conduct a review of the 737 MAX 9 aircraft's automatic stabilization systems and that Boeing had agreed to the order.

Boeing said it would work with the FAA to develop a software fix and would continue to work with the FAA.

The FAA said it would communicate further as it continues its investigation.

Boeing 737 MAX 9 aircraft are operated by carriers around the world, including American Airlines, Delta Air Lines, United Airlines, British Airways, and Air France.

The FAA's announcement comes after several airlines around the world have grounded their 737 MAX 9 aircraft following the incidents.

The FAA order affects the 737 MAX 9 aircraft, which is the latest model in the 737 family and has been designed to achieve fuel efficiency and lower operating costs. The aircraft has a maximum capacity of 189 passengers.

Boeing is the world's largest airplane manufacturer and its 737 series is one of the most popular in the industry.
Bangladesh police arrest opposition members over train fire

The Bangladesh Nationalist Party (BNP) has arrested several opposition leaders over a train fire that killed four people and injured several others. Police launched raids on several houses and arrested 14 people as part of an investigation into the train fire. The BNP has denied any involvement and said it was a “false accusation”. The opposition claims the police are using the incident to further silence their voices and prevent them from participating in upcoming elections. The BNP has called for a parliamentary probe into the incident and has demanded the release of all arrested members.

North Korea fires rounds of artillery near South’s island of Yeonpyeong

North Korea fired several rounds of artillery near South Korea’s Yeonpyeong Island on Thursday, after South Korea fired back in response to the North’s earlier provocations. The shooting came just hours after South Korea said it had fired back in response to North Korea’s earlier test-fire of a submarine-launched ballistic missile. The South Korean military said the incident was a serious provocation and that it would take “all necessary measures” to protect its territory and people. South Korean officials also said they had increased their military readiness in response to the North’s actions. The incident comes amid growing tensions between the two Koreas over a range of issues, including the North’s nuclear and missile programs and its recent provocations, such as the sinking of a South Korean warship in 2010. The South Korean government has called for a resumption of dialogue with the North to address these issues.

Myanmar ethnic groups claim key northern town

A military alliance of ethnic minority groups in Myanmar has captured an important town near the Chinese border, in what is described as a significant blow to the government’s efforts to pacify the region. The alliance, known as the Ta-ang National Liberation Army (TNLA), said it had taken control of the town of Mindat in Kachin State, which is located near the Chinese border. The TNLA has been fighting for autonomy and better living conditions for the region’s ethnic Ta-ang people, who are being displaced by Chinese investments in the area. The capture of Mindat is seen as a major victory for the TNLA and a setback for the government’s efforts to stabilize the region.

Japanese quake toll exceeds 100, over 200 missing

The death toll from the 7.3-magnitude earthquake that struck Japan’s eastern coast on Friday has risen to over 100, with more than 200 people still missing. The earthquake, which hit the Chiba and Ibaraki prefectures, caused widespread damage and triggered a tsunami that has caused significant loss of life and property damage in the region. Rescue operations are continuing, with rescue teams searching for survivors in the hard-hit areas. The government has declared a state of emergency in the affected area and has urged residents to stay away from coastal areas. The earthquake has also caused a power outage in the prefecture of Chiba.

Laos PM in Hanoi

The Prime Minister of Laos, Thongloun Sisoulith, arrived in Hanoi on Thursday for a two-day visit at the invitation of Vietnamese Premier Pham Minh Chinh. The visit is expected to further strengthen the bilateral relationship between the two countries. Laos is a member of the Association of Southeast Asian Nations (ASEAN), and the visit is seen as a step towards deepening cooperation in various fields, including trade, investment, and development. The two leaders are expected to discuss a range of issues, including cooperation in ASEAN, and the implementation of the Belt and Road Initiative. The visit is also seen as a chance to discuss the development of transport infrastructure, including the long-awaited Hanoi-Vientiane railway project, which is expected to significantly improve connectivity between the two countries.
UK police launch fraud inquiry over post office IT scandal

APP London

UK police have announced a fraud inquiry following allegations made by former workers of the Post Office that the company's IT software, introduced between 2009 and 2011, was to blame for a series of cases where post offices were unable to meet deadlines. The Post Office has been under pressure to explain how it has handled the situation, and the inquiry could provide answers to concerns raised by former workers who have been convicted of theft or fraud.

Palestinian supporters call for end to violence in London rally

APP London

Palestinian supporters take part in a demonstration in central London calling for a ceasefire in the war in Gaza. The demonstration was held in solidarity with the Palestinian people and their struggle against Israeli occupation and tyranny.

NatWest chairman criticised for saying it is not difficult to buy a house in Britain

APP London

The chairman of NatWest, Greggs, has been accused of being out of touch. The comments, which were made earlier this week, have been widely condemned as insensitive and inappropriate. The chairman's comments have been met with widespread criticism, with many calling for him to resign from his position.

India's Sun probe reaches solar orbit

APP Tokyo

India's Sun probe, the first of its kind, has reached the solar orbit. The rocket carrying the probe was launched on November 17, and it has successfully entered the Sun's orbit. The probe is expected to provide valuable data on the Sun's activity and help scientists understand the solar system better.

India orders new drug-making standards after overseas deaths

APP New Delhi

India has ordered new drug-making standards after several deaths overseas. The move comes after reports of deaths in Europe and the United States, where some patients died after taking medicines made in India. The government has ordered the drug industry to improve its standards and ensure that its products are safe for consumption.

UK Ugandan who claims mistaken identity extradited from Britain

APP London

A Ugandan who claimed to be a refugee from his country has been extradited from Britain to Uganda. The extradition was carried out after a court ruled that he had no legal basis for his claims and that he was eligible for extradition.

World

APP London

The team at NatWest was criticized by the Financial Conduct Authority (FCA) for its approach to identifying potential wrongdoing. The FCA said that NatWest had failed to properly investigate or report suspicious activity.

The US fugitive who claims mistaken identity extradited from Britain

APP London

The US fugitive who was arrested in the UK has been extradited to the US. The fugitive, who is believed to be wanted for fraud, was extradited after a court ruled that he had no legal basis for his claims.

India's Sun probe reaches solar orbit

APP Tokyo

India's Sun probe, the first of its kind, has reached the solar orbit. The rocket carrying the probe was launched on November 17, and it has successfully entered the Sun's orbit. The probe is expected to provide valuable data on the Sun's activity and help scientists understand the solar system better.
Clarifying America’s great inequality debate

ByDoes Acemoglu

D
ot much about inequality seems certain these days. The results of the 2020 presidential election, the ongoing pandemic, the recent surge in global inflation, and the rise of discussions on global inequality have all added to the uncertainty. This has led to a proliferation of different views and interpretations of the causes of inequality.

Inequality in America has been a topic of great interest for many years, and there are differing opinions on how it should be measured and understood. While some argue that inequality is a result of structural factors, others believe it is caused by individual choices and policies. These debates have been further complicated by the rise of COVID-19, which has had a significant impact on the economy and on the distribution of income and wealth.

In this article, we will explore the causes of inequality in America and discuss some of the recent developments in this area. We will also examine how these developments may affect the future of inequality in America.

The lagged and ongoing effects of elevated real interest rates are sets to keep global activity weak and thereby moderate inflationary forces in the coming months.

Eating global supply pressures are also expected to contribute to the lagged inflation. These pressures have recently receded to levels seen in the late 1990s, as the global economy has begun to recover from the pandemic. However, global supply pressures remain high, and there are concerns that they may continue to increase in the coming months.

Monetary policy will remain restrictive in major economies in a bid to keep inflation under control. In the United States, the Federal Reserve has raised interest rates several times in the past year, and it is expected to do the same in the coming months. In Europe, the European Central Bank (ECB) has also raised interest rates, and it is expected to do the same in the coming months.

The implication is that it will be harder for central banks to start cutting policy rates, and they will keep their exchange rates largely firm. This has led to growing inflationary forces in the eurozone, where the European Central Bank (ECB) has raised interest rates several times in the past year. These forces are expected to continue in the coming months, as the ECB is expected to raise interest rates further in the coming months.

It is important to note that the lagged effects of elevated real interest rates are expected to continue in the coming months, as the global economy has begun to recover from the pandemic.

Russia ‘to produce over 32,000 drones each year by 2030’

Russian official: ‘We have made many more drones each year than our three main rivals combined’

The Russian Ministry of Defence announced that it will begin producing 32,000 combat drones each year by 2030, underlining Moscow’s efforts to modernise its military and stay on top in the arms race. The announcement came as Russia, along with China and the United States, is entering the era of drone warfare.

‘Russia now has 32,000 combat drones in its arsenal. In 2030, we will produce 32,000 drones each year. This is much more than our three main rivals combined,’ Deputy Defence Minister Alexei Antonov said at a press conference in Moscow. ‘By that time, we will be leading in the development of weaponry. The United States, China and Russia are the main states involved in the drone industry. We are working on drone technology both at the national level and in cooperation with China. In 2030, we will produce more than 32,000 drones each year. This is much more than our main rivals combined.’

In Paris, rally for Palestinians

In Paris, France on Saturday, a rally was held to show support for the Palestinian people. The rally was organized by the Association for the Recognition of the Rights of the Palestinian People and the March 15 Movement. The rally was attended by hundreds of people who displayed banners and posters in support of the Palestinian people. The rally was held in front of the United Nations Office in Paris, which has been consistently supporting the Palestinian cause.

Russian missile attack kills 11; 4 Ukraine missiles downed

A Russian missile strike killed 11 people and wounded 48 others in a residential area in Kyiv, the Ukrainian capital. The attack was launched by S-300 missile systems, which are capable of targeting low and medium altitude targets. The S-300 is a long-range air defense system, which is capable of targeting aircraft, helicopters, and missiles. It is a sophisticated and advanced weapon system, which is capable of engaging with multiple targets simultaneously.

Blinken in talks with Erdogan whisk on Gaza diplomatic tour

U.S. Secretary of State Antony Blinken held talks with his Turkish counterpart, Mevlut Cavusoglu, on Saturday in the context of Blinken’s planned diplomatic trip to the Middle East. The talks focused on the ongoing crisis in the Gaza Strip, where a ceasefire has been negotiated but not yet implemented.

Where did Russia get its North Korean missiles?

Russia has bought multiple North Korean missiles, including the Taepodong, according to two former military intelligence sources, who claim that Russia has been paying up to $1 million per missile. According to Russian media, the Taepodong is a long-range ballistic missile, which is capable of carrying nuclear warheads. The Taepodong was first tested in 1998 and is capable of reaching targets in Europe. The missile has a range of about 6,000 kilometers, which makes it a serious threat.

Russia has bought multiple North Korean missiles, including the Taepodong, according to two former military intelligence sources, who claim that Russia has been paying up to $1 million per missile. According to Russian media, the Taepodong is a long-range ballistic missile, which is capable of carrying nuclear warheads. The Taepodong was first tested in 1998 and is capable of reaching targets in Europe. The missile has a range of about 6,000 kilometers, which makes it a serious threat.

Blinken hails ‘highly successful’ nuclear talks with Iran

U.S. Secretary of State Anthony Blinken hailed the “highly successful” nuclear talks with Iran as the best opportunity in years to secure a comprehensive agreement with the Islamic Republic.

VIVE LA RÉSISTANCE DU PEOPLE PALESTINIEN!

Hailing a banner that read, “Long live the resistance of the Palestinian people.” The rally is part of the support for the Palestinian people. The rally is held in front of the Palestinian Embassy in Paris. Behind the banner, a group of people is holding a sign that says, “Support for the Palestinian people.”

Where did Russia get its North Korean missiles?

Education City Tram to increase frequency during AFC Asian Cup

By: Joseph Vaghasia

The Education City Tram will increase its frequency during the AFC Asian Cup in Qatar, according to the Qatar Transport Authority (QTA). The tram service, which operates on a loop between Education City and Katara, will be extended to the Katara Cultural Village, which is one of the main venues for the tournament.

The frequency of the tram service will be increased from 15 minutes to 10 minutes during the AFC Asian Cup, which runs from January 16 to February 1.

The increased frequency will allow passengers to reach the various venues more quickly, making it easier for fans to attend games and return to Education City.

The Education City Tram is a key part of the Education City master plan, which aims to create a sustainable and connected community. The tram service is one of the key modes of transport in Education City, along with buses and bicycles.

The increased frequency during the AFC Asian Cup is one of the many measures being taken to ensure a smooth and enjoyable experience for fans and visitors alike.

Football fever returns with AFC Asian Cup 2023, festive events

Katar goes up for AFC Asian Cup

After enduring two years without football due to the COVID-19 pandemic, the AFC Asian Cup is set to return in 2023. Qatar, the host nation, is preparing to welcome the world’s top football teams for a month of intense competition.

Football fans across the globe are eagerly anticipating the tournament, which is one of the most prestigious football events in Asia. With venues across the country, fans can expect a spectacle of footballing excellence.

Katar's preparation for the AFC Asian Cup has been relentless. The nation has invested heavily in infrastructure, ensuring world-class facilities are in place. The Khalifa International Stadium, the venue for the final, has undergone extensive renovations and is set to deliver an unforgettable experience for the thousands of fans expected to attend.

In addition to the main venues, Qatar has also invested in developing grassroots football. The country has been working to expand the game at all levels, aiming to create a generation of local footballers ready for international competition.

Katar's hosting of the AFC Asian Cup is a testament to the country's commitment to football. With strong support from the government and the private sector, Katar is ready to showcase its love for the sport to the world.
